

## AGENDA

Dear All,

The Association of Thermal Engineers of Serbia and the Serbian Energy Law Association are pleased to invite you to the Panel titled **"Use of electricity in the transport sector in the Republic of Serbia - directions and challenges"**.

The panel will be held on Monday, June 27, 2022, and at the beginning at 12:00 at the Faculty of Mechanical Engineering, University of Belgrade, room 211.

Panel participants are:

1. Dr. Slobodan Mišanović, GSP Belgrade (Public City Transport Company),
2. Prof. dr. Ivan Blagojević, Faculty of Mechanical Engineering, University of Belgrade.
3. Nenad Pavlović, M. Sc, Petroleum Industry of Serbia, Jsc,
4. Aleksandar Miladinović, Petroleum Industry of Serbia, Jsc,
5. Tomislav Mićović, Association of Oil Companies of Serbia,
6. Dr. Miloš Petrović, Serbian Association of Importers of Vehicles
7. Dr. Branislava Lepotić Kovačević, Serbian Energy Law Association.

Moderator: Prof. dr. Dragoslava Stojiljković, Faculty of Mechanical Engineering, University of Belgrade.

The aim of the Panel is to demonstrate, through presentations and discussion, the possibilities and challenges of using electricity in the transport sector in a comprehensive way: providing electricity from renewable energy sources for the transport sector, oil companies expanding their activities by installing chargers for electric vehicles and at the same time developing plans for promoting electricity from renewable energy sources, import and structure of vehicles and public transport in cities - influential factors on energy consumption and energy efficiency, legal regulations governing the use of electricity in the transport sector, influence on construction standards for residential and commercial buildings.

Dr. Branislava Lepotić Kovačević,  
President of Serbian Energy Law Association

Prof. Dr. Milan Radovanović ,  
President Society of Thermal Engineers of Serbia
